A FAMILY NEWSPAPER—DEVOTED TO NEWS, LITERATURE, SCIENCE, MORALITY, AGRICULTURE AND AMUSEMENT.

Vol. XVI. *Philadelphia, April 15, 1837.* *Whole No. 820.*

THE PHILADELPHIA BANK.

To accompany the elevation of the new building, now erecting for the Philadelphia Bank, we have procured the following notice of its origin, and the several acts of Assembly, incorporating the establishment, and extending the charter from time to time to the present. The bank takes place in a series of great magnificence and permanency. The description of the Banking House, has been kindly furnished by the architect, Mr. Strickland, and from whose hands we need not fear but it will be executed in a manner worthy of the institution.

The Philadelphia Bank is situated on the south west corner of Third and Fourth streets. The foundations of the building are 70 feet in front, and extend back 100 feet to Library street. The front, which will consist of a basement story 15 feet in height, containing the stores or shops, finished over for the security of the banking rooms, will be supported by eight columns of the Ionic order, 3 feet in diameter, and 28 feet in height, and an entablature and cornice for the accommodation of the Board of Directors, Cashier and Directors, there are to have immediate communication with the banking room, and the basement story will be occupied by the Bank Porter, and for the deposit of the specie. Under the banking room will be a vault, 30 feet square, and 12 feet deep, for the deposit of the specie. Under the basement story will be a vault, 30 feet square, and 12 feet deep, for the deposit of the specie. Under the basement story will be a vault, 30 feet square, and 12 feet deep, for the deposit of the specie.

The principal story is 28 feet in height, and is entered from the portico, which is 12 feet deep, and 70 feet in front, and is supported by eight columns of the Ionic order, 3 feet in diameter, and 28 feet in height, and an entablature and cornice for the accommodation of the Board of Directors, Cashier and Directors, there are to have immediate communication with the banking room, and the basement story will be occupied by the Bank Porter, and for the deposit of the specie. Under the banking room

Saturday Evening Post.

APRIL 25, 1840.

The Governor's Proclamation came to hand too late for the first edition of last week. That our Pennsylvania country subscribers might have the benefit of its perusal, we delayed its publication to this time.

Pennsylvania, ss.

In the name and by the authority of the Commonwealth of Pennsylvania: by *Joseph Ritner*, Governor of the said Commonwealth.

A PROCLAMATION.

Whereas, The Legislature has adjourned without making any provision for the payment of the interest on the loans of the Commonwealth, unless a true statement and account of the moneys at the disposal of the proper officers for payment, could be made and rendered known. Therefore I have thought it proper to make the following statement of the unexpended appropriations, applicable to the purpose with which the public faith is pledged, viz:

Erie Extension.—Unbroken balances in the Treasury of the 15th of March last, of the sums appropriated per act of the 18th February, 1836, ... $145,000 00

North Branch Canal.—Unbrawn balance on 21 April, instant, ... 100,207 76

Gallsburg Federson & Connelsville Rail-road.—Unbrawn balance on the 25th March last, ... 150,000 00

To Reland Brought of Dawson's Island—Per resolutions of '5th December last, and 4 April inst. 111,000 00

Erie Extension, Damages, Lawson, Fires, &c.—Per act of 8 March, 1837, ... 275,976 00

Tide-water Loan of two hundred thousand dollars, at four per cent for the continuation of the works on the Erie and North Branch Canals, by resolution of 30th June, 1838, ... 200,000 00

$1,282,183 76

As the contingency will, in all probability, occur to which the appropriation last mentioned was directed, viz: The expenditure of the appropriation on the 1st of February, 1838, before any further means for the completion of the works specified, shall be procured by the Legislature, it will become the duty of the Executive, to obtain the money, and apply it to the intended object.

If all the foregoing sums should be exhausted before the day fixed for the meeting of the next Legislature, I must deem it my duty to convene the said General Assembly, to take such measures as they may deem necessary and proper, to provide means to sustain the faith of the Commonwealth and the credit of our cherished System of Internal Improvements.

In the meantime, contractors, workmen, and others, may be assured I consider the faithful execution of engagements made according to law, with the agents of the State, inasmuch as the same has been ratified by the subsequent acts of the Legislature, to be equally binding upon the Commonwealth, as the original contract itself; and that I will not fail to use all the means in my power

To Agents and Subscribers.

Agents who have funds in their hands are respectfully requested to make remittance, stating the amounts received from individual subscribers, and to collect the arrearages due, agreeably to the terms published in every number. The deduction of receipts, by which the subscribers accounts are not duly credited for cash paid, must necessarily cause denunciations.

We have again to request that the subscribers will turn to their accounts at the beginning of the new year, and see if there is not something due the printer.

An immense amount is due, and ought long ere to have been paid. We shall be compelled against our inclination, to discontinue the papers of many who are long in arrears—and hope they will take this hint, and make a settlement.

Many of our subscribers, on the first of January, and their papers discontinued unless paid—they are determined to adhere to this rule, and will not be so often reminding them.

In order to avoid mistakes, it is requested that the second day. It is hoped that each and every one will pay up.

ATKINSON'S SATURDAY EVENING POST.

PHILADELPHIA:

Saturday, April 15, 1837.

TO Still Subscribers.—At No. 31 in the Arcade, under the Musical Fund Hall, Chestnut street, between Fifth and Sixth streets, the Morus Multicaulis Trees, are kept for sale. These are produced from the Genuine Parent Silver White. The Chinese Mulberry, which is never from higher than 15 feet, are kept at the same place. It is thought this species will supercede the Italian Mulberry.

The Secretary of the Treasury reports that the receipts in the Treasury for the month of January, were $2,365,270.35; for customs, $1,115,000; and for public lands, $1,250,000. In February, $2,987,239.40; for customs, $1,297,762.40, and for lands, $1,689,476.91—being more than five and a quarter millions for two months.

Finally—It is said that the celebrated musical composer, Rossini, actually addressed an ode to his mother, in the following words:—"Mamma! To the very illustrious lady, mamma of the immortal Rossini."

Messrs. Carey, Lea & Blanchard are publishing a uniform edition of the works of Washington Irving. The seventh and eighth volumes contain the Tales of a Traveller. The several stories are handsomely bound.

Littell's Museum for April contains as usual, interesting variety of foreign matter.

The following will explain why cards were not received a few days ago for a party to which it is addressed. We noticed in the paper of a slackening a similar concession on feeling for the case of delinquent subscribers.

Mr. Dear Graeff,

Sir—You will please to accept the invitation of myself and family to a party at our house this evening, for twenty-five years ago. That is the first party we ever had in our married state, and the last, I am determined. Please to notice it in the Saturday Evening Post.

THE TIMES—THE EAST AND THE WEST.

It is stated by a person, who asserts that he got his information from the best sources, that the several failures in this city, for the last week, reached millions.—That the failures of Messrs. Josephs have been understated, being nearer six millions than two.—That the failures in Boston amount to four millions. Several failures in that city, also are rumored in millions. The cause is the consequences of these crashes, and the severity of money in the eastern cities, which is so oppressive for years, among its victims.

Under the existing distress, many operatives in mechanics have determined to emigrate to the west, in companies and bands. We applaud the resolution, as one can scarcely fail to better their circumstances.

Mechanics and labourers are in demand in the south, now and flourishing times in every section where cotton and sugar are grown, plenty to do at high prices, and in the former at very low prices of board by the year. A letter received by a gentleman in New Orleans says, "Every thing looks prosperous here. Cotton is coming in fast, and Labourers are much in demand, at very high wages. What a pity our friends in the North will not come here! Any family who would come here, and have their own house, could live like princes."

CHESS.

La Literature Feuilletonne announces that an interesting fact recently been published in Paris by the celebrated artist Robert, under the title of "Chess Cosmos." The subject, we believe, is the only allegorical work of the kind ever published, and is a most singular production. The plates are executed in the most superior manner, and the printing exhibits the perfection of the typographic art. It is said, also, to be striking and impressive in the highest degree.

A New Orleans paper of the 1st inst. says that most of the steamboat line, which took the ice in Ohio above Cincinnati, on the 6th ult. are making every exertion to the effect to get up the river from the first discovery. The wind was light on the 30th ult. and the boats were all under way, and on the 31st sailed from Louisville, and consequently were the first which reached this port.

A paragraph in the above letter seems to refer to persons are supposed to have perished in the ice. The list of the captain was not given in the early presence.

A recent number of a Parisian journal *Le* contains some severe remarks, on the general style and character of the Parisian newspapers. It is, indeed, true, in every instance, that the press of that city, in point of service, there is a strange nonchalance and carelessness of materials of all kinds, seldom marked in any other country. Even the best Paris journals would be a defect, if not intolerable, to those of the French, were intended solely for the perusal of persons in the country, instead of being devoted to the inhabitants of almost every class of readers. The general character of the Parisian journals is, indeed, a most curious subject, and a thorough analysis of it, would be furnished with information on those points of the subject, and reveals which possess some degree of attraction. Such a work would be a literary curiosity, as much useful knowledge from an American journal, as he would from twenty French ones. Nearly all of what is locally directed to the native observer, or a single sample of which a dozen can be little doubt, that in the creation of the Parisian journals, the money system is described. Those studies require, they would be rather unbearing a great variety of subjects in their pages, their subscription list and sales fro- ... Indeed, the information they communicate is ... disseminated or altered, in France where ... is treated of in Paris, is ... confined to a few hundreds. ... however, with their most extensive circulation ... influential readers, but the fact is well established without. The *Revue Encyclopedique*, ... published by the best conducted journal of the kind ... had, in the tenth year from its commencement only fifteen hundred subscribers.
